productivity
increase

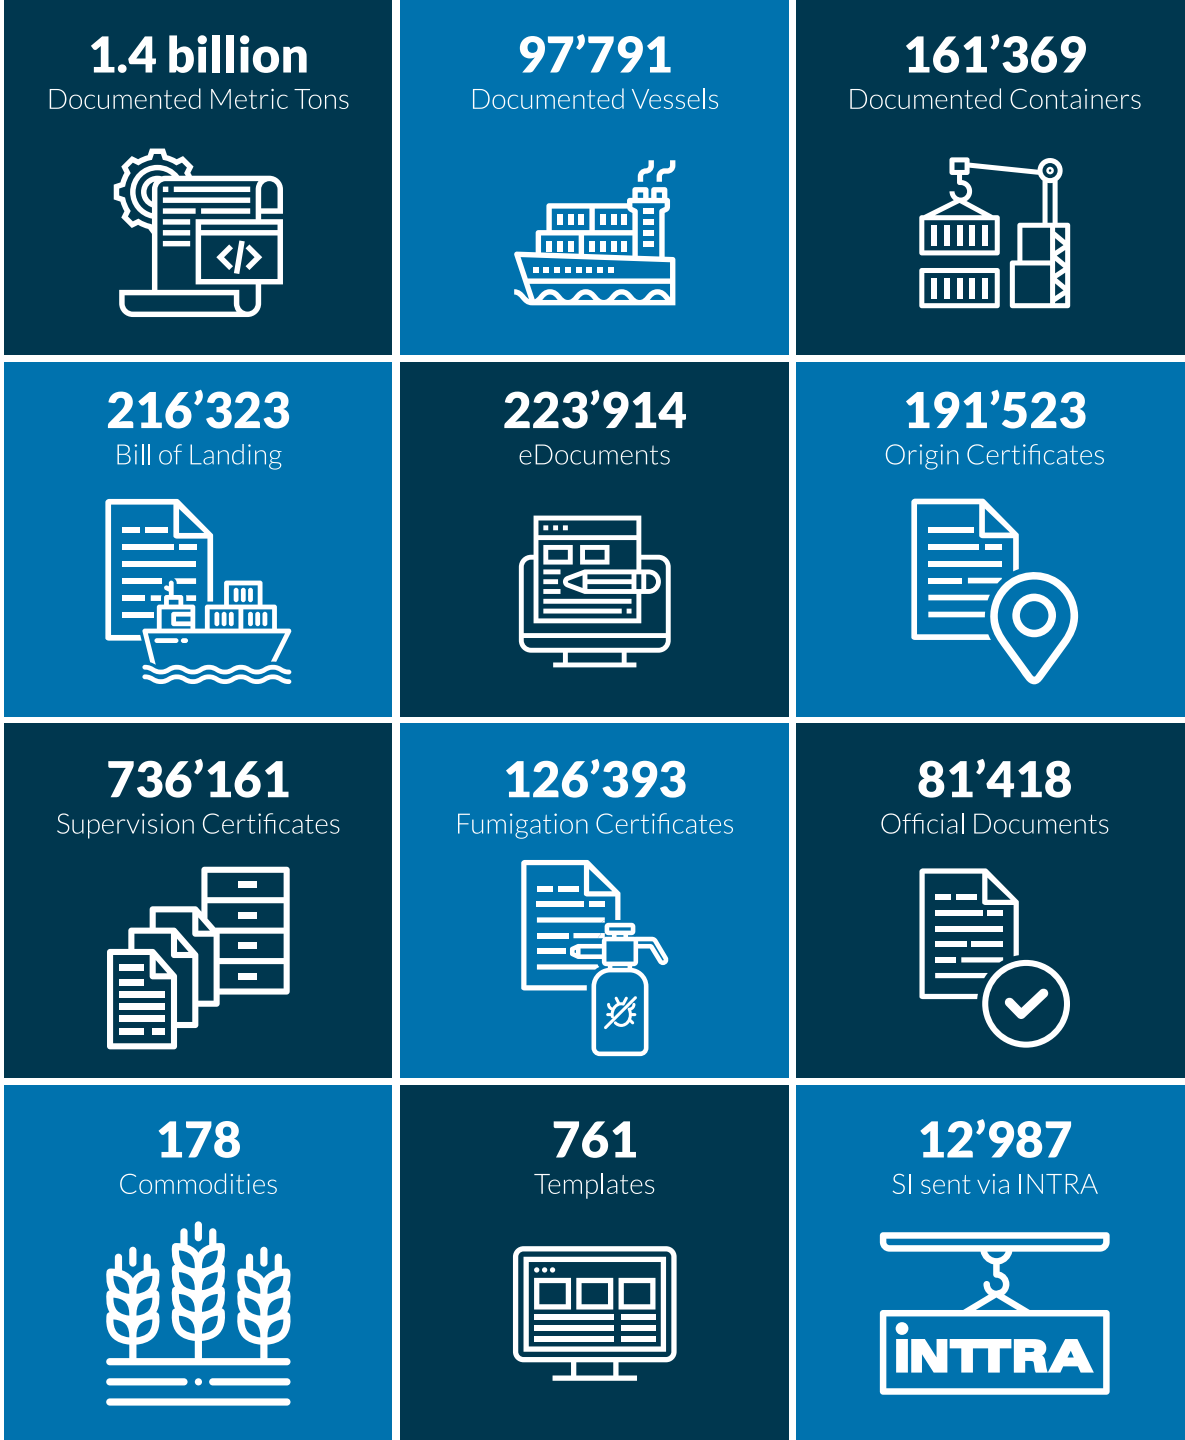

performance improvement

convenience

edoxOnline is the leading web-based platform for the digitalization of International Trade Processes and Documents.

The largest Multinational Trading companies and thousands of SMEs collaborate efficiently in the issuance of key transactional documentation such as blockchain electronic Bills of Lading, Certificates of Origin, Certificates of Quality as well as many other shipping and commercial Documents.

Our Clients control in real-time the documentation being produced in a smooth, reliable, efficient and secure manner.

Inefficient

2

Repetitive

**Documentary
Complexities
in International Trade**

Manual

Error-prone

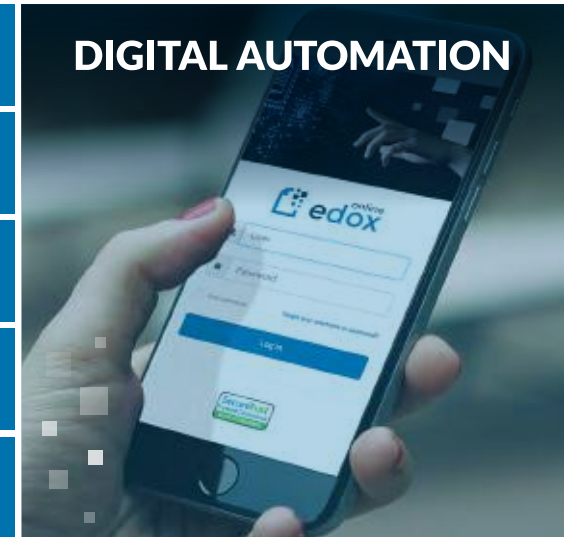

Still today, the issuance of documents is a manual and repetitive task for many companies, making it a slow, tedious, error prone and consequently, an inefficient activity.

edoxOnline substantially improves companies' performance and reduces operational costs by increasing functional productivity and reducing penalties for delayed or wrongly produced documents.

MANUAL PROCESS

Inefficient activity	>> >>	Productivity enhancement
Slow and disconnected	>> >>	Real-time collaboration
Tedious	>> >>	Automated process
Error prone - Costly penalties	>> >>	Data accuracy
Sensitive to commercial fraud	>> >>	Operational Compliance

**Cutting-edge
Platform**

Collaboration

Business expertise

Block chain technology

Documentary Instructions entered into edoxOnline by the Hub or Destination Office are automatically sent to the Origin Country (Exporter), so that it can work jointly with the different actors such as Maritime Agencies; Surveyors; Fumigation Companies; Custom Agent; Chambers and Customs.

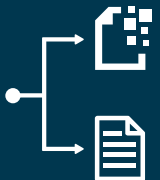

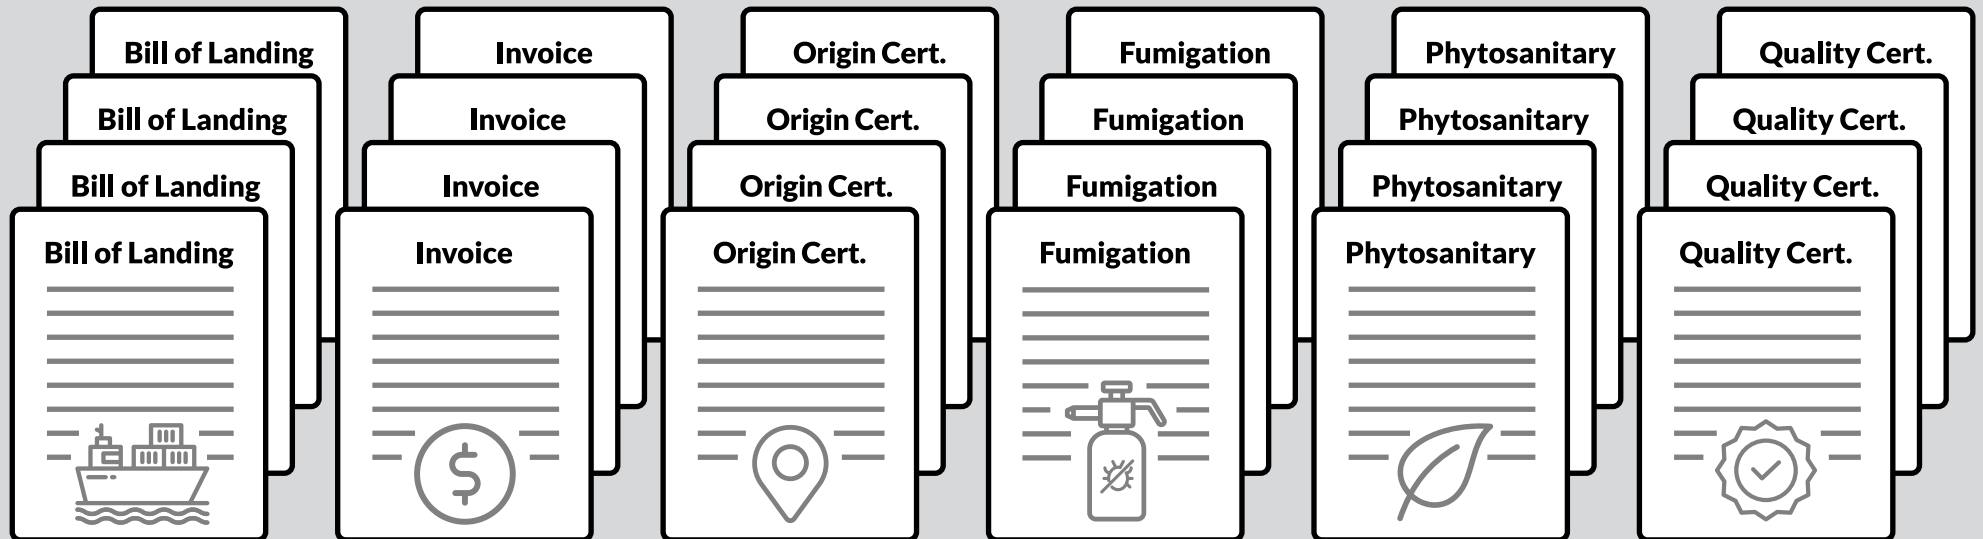

This illustration exemplifies a frequent **Brazil-China Soybean** trade. The convenience of our process successfully applies to other trades such as **Iron-ore from Australia to China**, **Oil from the Middle East to USA** or for the **containerized business all around the world**.

edoxOnline digitalizes your company's processes and documents with the use of the most advanced technology.

With just a few clicks, edoxOnline smart business functionalities make possible the issuance of multiple sets of shipping and commercial documents.

Once documents are drafted as required, you can choose between electronic documents, using our eDocuments feature (eBL and eCerts), or print-outs.
